If you're after Split System Reverse cycle air conditioners we can advise you on the best size to suit your needs.

Check out our latest Betta Catalogue for some great deals on washing machines and dishwashers with 6 year product protection on selected items.

Produce

What a start for April we have had! The great rain will finish off the Summer crops and we will have plenty of moisture for the Winter plant. The lead up to Winter should also see a good growth of grass—I've never seen the feed take off like it has, the Kikuyu has just gone mad!

We have good stocks of oats and Moby barley on hand. There are plenty of varieties of oats for you to pick from and we have supply of vetch, turnips and all pasture seeds. We can inoculate, mix and bag all your needs for you, and customise pasture mixes to suit your country and your needs.

Plenty of drenches are available—oral, pour-on and injectable. Everything should get a drench now leading into Winter to give them a good start and clean them up. Also there are still a lot of buffalo fly getting about. A good drench now will get both jobs done and have your stock powering ahead.

What about the cattle prices... who would have thought!!!
