New Accounting System

On May 25th our accounting package underwent a major update. What does this mean for you? Not much! You may notice a change to the way that your invoices and statements are printing this month, but otherwise it is business as usual. While there are still some issues that we need to iron out, it has been a largely successful transition. We expect that once we are all used to the new processes, it will actually be easier to use than the old one.

Home Timber & Hardware

Winter has finally arrived and so has the frost! Don't let your garden suffer from the harsh effects of Jack Frost - we have a solution to help save all that investment and hard work you've put into your garden. We stock 1.8m wide hessian and 2m wide frost cloth. Both are sold by the metre and perfect to cover your plants during frost season. We also stock a marvellous product called Envy. Envy can reduce moisture losses by up to 50%, eliminate sun and windburn damage, as well as increase frost tolerance by an additional 4 degrees. Envy will not impede plant growth or photosynthesis, is non-toxic, pH neutral and will biodegrade in sunlight.

The approaching end of financial year and a price increase due next month means that now is the perfect time to stock up on Waratah Fencing products! Waratah is also offering cash back deals until June 30 on their Jio Galstar Maxy and Jio Extreme fence posts. Please come and see us or give us a call for all the details.

CRT—your Local Bloke

Finally, we have some Winter! These frosts will hopefully bring the moisture down in the sorghum. The weather has been a nightmare for harvest, and then the guys who want to plant need rain because it is too dry! We are whinging... it is either too dry or too wet! Things will happen and the prices are staying firm so we will have to be patient and the westerlies will happen.

The cattle market is still very good and by all reports it will stay there. Your stock are a very important commodity at the moment, so look after them with vaccines, drenches and keep the feed in front of them. We have good stocks of wheat and barley seed ready to go, just put your requirements in.
